Project of the Month

Bill and his family have just moved to Cary. They wanted to add entertainment for 8-year old Charlie, while keeping their décor. The TV was mounted in the book case using a cantilever mount. This allows the TV to be pulled out and turned. Four in-wall speakers were discretely mounted close to the ceiling. All the AV equipment and the subwoofer were enclosed in the cabinet. An IR repeater and an air cooling system were added, allowing the remote and the system to operate behind closed cabinet doors.

Bill also has out team run several PC LAN cables so his computers ran quickly and reliably. That included a cable to the Apple TV below the TV. The ensemble works flawlessly.

Review: *Marc and his team were professional, prompt and provided great pricing for my surround sound speaker and cat 5 cabling installation.*

He was always on-time and his estimates matched what I paid. He had great suggestions for products (speakers, TV mount, IR repeater).

Finally, he always double checked if he was going to do something that wasn't part of the original plan (i.e. needed to install a hidden junction box).

Bill R., Cary
