Installation Report: Outten Chiropractic

Medical offices want to keep their patients entertained and informed while waiting for treatment. It would certainly help if they could encourage their clients to return or recommend their services.

Dr Chris Outten of Outten Chiropractic in Cary had us mount HDTV's in both the reception and treatment rooms. The TV's are computer displays. The PC is getting constantly changing digital signage from the Chiro TV Network on the internet. The Doctor can program the ticker tape at the bottom of the screen to display his own information. The application can also be connected to his choice of music channels. A similar product is available to Dentists. It educates and communicates with patients.

As usual, Cardinal securely wall mounted the TV's and hid all cables. Our methods meet or exceed North Carolina's Construction and Electrical codes.

Dr. Chris and Lisa Outten said:

Patients have commented on the interesting and valuable information. We are most grateful to Cardinal for studying all aspects of the system and educating us prior to the installation. Their work is clean, fast and esthetic. We recommend Cardinal to our patients and colleagues.
